Canadian Pacific Announce Bargain Fares To Coast

Bargain fares to the Pacific Coast which were offered to the public last Spring, proved so popular the Canadian Pacific will repeat them this Spring it was announced by Mr. C. R. Moore, tickets on sale April 13th to 20th inclusive, with 21 days return limit, and will permit stop-over at Banff, Nelson and stations West. A feature of these fares will be the privilege of tourist or standard sleepers, at slightly higher rate and usual berth charge. The special cost, a mile fare good in coaches will also be available.

Springtime is a particularly delightful season on the Coast, and indications are many will avail themselves of the low fares and make the trip at this season.

R. M. of Mantario No. 262

Minutes of meeting held on Monday, the 1st of April, 1935, at the Municipal office. Present: Reeve Dahl and a full council. Minutes of special meeting of March 18th, read and confirmed on motion of Cn. Hawtin.

Minutes of previous meeting of Relief Committee read and confirmed on motion of Councilor Edwards.

Monthly statement accepted and filed on motion of Cn. Francis.

Finance committee examined accounts presented. The following were found correct and passed for payment on motion of Cn. Montgomery.

Printing, postage and stationery—Hazen and Twiss, 90; Commercial Printers, 7.88; See, re city treasurer, 23.28; Municipal Telephone Co., 2.02.

Association Gopher Poison, 212.35.

Fire account—Empress Lbr. Yards, lamp, 9.95; Romington Hand Co., adding machine, 37.70, date, typewriter, 40.45.

SPECIAL EASTER FARES

EMPRESS DRUG CO., Ltd.

We are agents for leading nurseries. Cut Flowers ordered on shortest possible notice.

Social Credit Meeting

A meeting of the Social Credit Group was held in the Sunday Church School room on Monday evening. A very large attendance was present to hear President D. Lush give his report on the Southern Alberta Social Credit Convention, held on April 4th and 5th at Calgary. The speaker gave a resume of the doings at the Convention and also spoke on other subjects from pamphlets which he had with him. He stated that the constituency was to be divided into four zones, and that three or four prospective candidates were to be elected at the constituency convention to be held at Suffield on May 3, and that the candidate would be selected from this group by the central committee at Calgary. The name of the candidate so selected possibly would not be known until ten days or so until after the election date had been announced. A few questions were asked, after which the meeting adjourned.

Alaska hospital, 150.50
Total, \$464.95.

Edwards—That school estimate, Chesterfield, 200.00; and 431.82. Byrs, \$390, be approved and that Rose Moin school district be referred for further consideration.
Francis—That the N of 20 26 27 w3, be assessed to the Holland Canada Ed. Co.

Hawtin—That this Municipal Council strongly protest against the new legislation re medical care of indigents, and that we are of the opinion the executive of the Association of Rural Municipalities should have more effectively presented the usual opinion of several recent conventions at which this question has been discussed; and that the explanation of the executive be asked for.

The Secretary was instructed to write both the President and the Department of Municipal Affairs in regard to the above matter, especially as to how this is to be financed.

Hawtin—That in view of proposed legislation, having for its object the taking out of cultivation certain lands which are poor farming lands, and with the object in view of keeping the applicants for such as few as possible, this council request the Department of Natural Resources to make no further allotments of land within the municipality until the council have been first consulted as to the possibility of the person being able to make a living off the land proposed to be taken for cultivation.
Lush—That Resolution No. 11 of meeting of September 12, 1932 (Hospital Agreement) be rescinded.

Francis—That the use of persons for whom the Municipality accepts responsibility for payment of hospitalization, in addition to other cases covered by the agreement, shall be (a) bona fide farmers and (b) bona fide paperage.

Cancer Fund

Alberta is leading the Dominion in its response to the Silver Jubilee Cancer Fund. This gratifying announcement was made last week by His Excellency, the Earl of Bessborough, when he visited Calgary on his farewell tour. In the campaign, which honours His Majesty's accession to the throne, His Excellency was particularly pleased with the small gifts already coming in from Alberta school children. He had just received a list of donations from Ottawa.

Potatoes As Food

The human body is often referred to as a furnace, the food as fuel and the heat given off as energy. Of the three elements in that fuel, namely, protein, fat and carbohydrates, the last named is referred to as the energy giver. Potatoes supply energy. As regards their general composition, they are slightly acid and contain a quantity of starch, a trace of sugar, a small amount of minerals and proteins and a large amount of water. The percentage of these component parts is: carbohydrates 18 per cent; minerals 9 per cent; protein 21 per cent; fat 1 per cent; water 70 per cent. The following are recipes for the everyday use of potatoes.

Boiled Potatoes—Select potatoes of uniform size, wash, pare and drop at once into cold water to prevent discoloration. Cook in boiling salted water until soft, which is easily determined by piercing with a skewer. For seven potatoes allow one tablespoon of salt and boiling water to cover. Drain from the water and keep uncovered in a warm place until serving time. Avoid sending to the table in a covered vegetable dish. In boiling large potatoes, it often happens that the outside is soft, while the centre is underdone. To finish cooking without breaking potatoes apart, add one pint of cold water which drives heat to centre, thus accomplishing the cooking.

Baked Potatoes—Select smooth medium-sized potatoes. Wash, using a vegetable brush, and place in a dripping pan. Bake in a hot oven forty minutes.

Federal House Adjourns

Ottawa, April 15.—The House of Commons voted today, 75 to 35, to adjourn, Wednesday, after Liberal leader Mackenzie King renewed his protest against a long Easter adjournment and a late general election.

Weather Forecasting Making Rapid Strides

Weather forecasting is reported to have made remarkable strides during the past few months. Research has been carried on into the stratosphere. Using a newly developed model of heated anemometer, the highest wind velocity ever officially recorded was taken at the Harvard station on Mt. Washington. Two gusts of wind were clocked at 231 miles per hour, while the highest five minute average was 188 miles an hour.

Young Liberal Conference

Plans for the forthcoming Young Liberal Conference to be held in Calgary, April 26 and 27, are progressing favorably according to reports from the various conference committees. Speakers will be selected on the political questions of the day have already been invited to lead the discussions. An informal dance will be held at the Business Golf Club on the evening of April 26. The final meeting of the conference is to be held Saturday evening in the Palliser Hotel.

tes or until soft; remove from the oven and serve at once. If allowed to stand, unless the skin is ruptured for escape of steam, they become soggy. Properly baked potatoes are more easily digested than potatoes cooked in any other way as some of the starch is changed to dextrin by the intense heat.

French Fried Potatoes—Wash and pare small potatoes; cut in eight lengthswise, and soak one hour in cold water to cover. Drain and parboil in boiling salted water to cover, two minutes; again drain; plunge into cold water, dry between towels, fry in deep fat until delicately browned, a few at a time and drain on brown paper. Heat fat to a higher temperature, return all potatoes to fat, using a frying basket, and fry until crisp and brown, keeping the basket in motion. Again drain on brown paper and sprinkle with salt.

Crosshopper Bait Indebtedness

An act of the Alberta Government entitled the Crosshopper Bait Indebtedness Act is being passed this session. It is as follows:

"Every person and every municipality now indebted to the Province in respect of any poisoned bait for the purpose of destroying grasshoppers, furnished at any time heretofore pursuant to any of the provisions of the Agricultural Pests Act, being Chapter 71 of the Revised Statutes of Alberta, 1922, is each hereby released and discharged from all claims, demands and liability in respect of such indebtedness; and all claims incurred by the Province in furnishing any such person or municipality with any poisoned bait as aforesaid shall be assumed to be borne by the Province and shall be deemed to be an expenditure for the good and welfare of agriculture."

This will be of great advantage to Improvement District and Rural Municipalities who formerly were required to assume one-half of this cost. It will leave just that much more money available for local roads and other local expenditures necessary for these units.

W. C. Smith.

Canadian Nat. Rlys. Revenues

The gross revenues of the all-inclusive Canadian National Railway System for the week ending April 7, 1935, were: \$3,140,032, as compared with \$3,289,375 for the corresponding period of 1934, a decrease of \$149,345.

7:30 p.m., Evensong and Service.

J. S. Parke
Vicar.

The Message of Easter

Shadow and sunlight, ebb and flood, mourning and rejoicing are not more opposite than the subdued and sorrowful mood befitting Lent, and the triumphant gladness of Easter. As Good Friday in the solemn passing results to us the day when the darkness of the cross made the sun ashamed to shine, so Easter Sunday, with a supreme radiance indicates the hour that is the coronation of humanity. At this time, humans look forward with gladness to the coming summer. The optimism of life once more surges in our veins and we look for the awakening green of the grass and the budding life of the trees. People put on new raiment, and the old world has a fresh appearance. Because Christ lives, we shall live; that is the message of Easter.

It is expected that final sittings of the Alberta will be concluded this week, and that prorogation will take place on Thursday.

Easter is a movable festival. It is always, the first Sunday after full moon which happens upon or next after the twenty-first of March; and if the full moon happens upon a Sunday, Easter is the Sunday following.

Farmers Leaving Area Smothered By Dust Storms In U. S.

Springfield, Colo. — Mountainous columns of powdered dust still smothered southeastern Colorado and nearby portions of Kansas and Oklahoma burying wheat fields and pasturing lands, fences and farm machinery.

It was the 12th consecutive day of howling gales and blinding dust for residents of Baca and Powers counties, in Colorado.

No longer do they find the storm a phenomenon. It has become a roaring menace to their existence, rapidly causing the slight means of subsistence they have salvaged from four successive years of extreme drought.

An exodus of residents of the stricken farm areas has been started. Kenneth Welch, Baca county relief administrator, said at least 100 families in the past week have sought refuge funds with which to seek relief elsewhere.

The first stock market of Pritchett, centre of Baca county's once prosperous livestock raising district, closed its doors Friday, as a result of the storm.

Directors announced the bank was solvent and would pay out in full, but could not continue business in the face of drought and the ruin caused by the dust storms.

"Dust pneumonia," caused by dust irritation of lungs, is no longer considered an immediate threat to life by physicians of this area. However, they still regarded infection from soil particles as partly responsible for six recent deaths.

Because of some disagreement over the effects of the dust, the Colorado state board of health sent one of its representatives flying into the storm section, in a national guard plane to obtain cultures at various altitudes.

Need Health Certificate

Bill Introduced In Alberta Legislature In Respect To Prospective Bride Couples

Edmonton.—Bills of health will be introduced by prospective bride couples in this province before marriages can be performed, under a bill introduced in the legislature by Hon. George Hoadley, minister of health.

Last year a similar bill caused widespread interest and was finally withdrawn, as it was felt that the public was not sufficiently informed.

An educational campaign has been carried on in the province during the year by those approving of such legislation and Mr. Hoadley expects it to receive a more favorable reception.

The minister said the Local Council of Women, women's institutes, Y. W. C. A., and the medical profession had approved of the proposed legislation.

Applies For Wheat

Paris.—Plans were announced to exchange United States apples for French wheat. France has agreed to give the United States 2,000 tons increase in its apple and pear quota in return for an agreement to ship a large quantity of denatured wheat to the United States.

Fire Is Started In Connection With Revolt At Kingston Prison

Kingston, Ont.—An ominous 10-month silence in Kingston penitentiary was broken when a fire started, apparently simultaneously—in two work departments in the big prison and 50 convicts locked themselves in cells of them with the intention of fighting the fire.

Fire Chief James Armstrong of Kingston announced that damage by fire and water to the boot and clothing workshop and the revolving prison stairs to their cells as flames raged less than 50 feet away in the building where mail bags are manufactured. Prison officials refused to discuss the developments in any way.

Fire Chief James Armstrong of Kingston announced that damage by fire and water to the boot and clothing workshop and the revolving prison stairs to their cells as flames raged less than 50 feet away in the building where mail bags are manufactured. Prison officials refused to discuss the developments in any way.

Prison officials refused to discuss the developments in any way.

Riot In New York

Negroes Run Wild When Told Boy Killed For Strangling

New York.—Rioters raged through Harlem, largest negro settlement in United States, bringing injuries to at least 100, besides smashing store windows and looting them of their contents.

Seven hundred policemen drawn from all parts of Manhattan which includes Harlem, and from Brooklyn to the Bronx, broke up mob gatherings but could not prevent guerrilla outbreaks. About 100 prisoners were booked at one station.

Police officials charged agitators with inciting the negroes and whites of the area to violence by telling them employees of a store had killed a young negro who was caught stealing a pocketknife.

In reality, the store manager had turned the boy loose although he had been told the two floor-walkers who caught him were alive.

Rainy Season Expected

Government Entomologist Looks For End Of Drought In West

Ottawa.—"We expect a more or less rainy season in the west this year, and that the drought is over," declared R. Painter, entomologist in the department of agriculture, in a report made to the west with the ravages of grasshoppers in recent years in the west, and the methods being taken to combat them.

Mr. Painter said two or three species of grasshoppers were responsible for the "outbreaks" which cause such distress and ruin crops. He said that the pests of semi-arid countries which had periodic drought conditions. But it was possible to kill 85 per cent. of these insects by application of "hail," consisting of bar, sawdust and poison.

During the year 1924 a total expenditure of \$708,000 was involved in the three prairie provinces in the work of extermination, he said.

Price Spreads Inquiry

Total Cost Of Investigation Is Given As \$254,000

Ottawa.—The total cost of the inquiry into price spreads and mass buying so far has been \$254,000, according to a return tabled in the House of Commons.

The largest proportion of this was consumed in the cost of auditing by private firms of chartered accountants the books of the companies involved. This amounted to \$181,161.

Legal fees to committee and commission counsel aggregated \$44,324, of which Norman Sommerville was the chief expert, his assistant, W. W. Parry, \$11,742.

Special investigators employed by the commission were paid \$24,960 altogether, this sum embracing also their services for the parliamentary committee last year. The cost of stenographic services was \$12,054.

Regaining His Health

Expected Premier Bennett Will Return To House In Few Weeks

Ottawa.—Government supporters in the House of Commons and Senate were given positive assurance by Sir George Perceval that their party chief, Prime Minister R. B. Bennett, had been given every reason to believe he would be back in his place in parliament within a few weeks.

So far as the best medical opinion could judge, the acting government leader told his colleagues, Mr. Bennett would be able to return to his parliamentary duties before prorogation and would be in condition to lead his party in the general election campaign. Mr. Bennett will be confined to bed for about another week, according to present progress, and will then seek recuperation at some health resort for about a fortnight.

Relief Distribution

329 Carloads Of Foodstuffs Sent To West By Presbyterian Church

Toronto.—The Presbyterian Church in Canada distributed 329 carloads of relief in the form of foodstuffs to drought-stricken areas in the west in recent months. It was stated at a meeting of the board of missions here.

In addition to the food supplies, which had been collected in the east and sent to the prairie provinces, and the Peace River district, 21,000 pounds of clothing were forwarded.

The number of families helped was 1,050. Mrs. W. H. Fletcher, Toronto, supervised the collection and Mrs. H. B. Horn, Regina, the distribution of articles. The church also provided 14 cases of Christmas gifts to needy families and in one instance cared for a whole community.

Royalty On Alberta Coal

Minister Of Labor Tells House Of A Paradox

Ottawa.—While the Dominion taxpayer is contributing to the Alberta coal mines by way of subventions, the Alberta government is charging a royalty on the output of the coal. Hon. W. A. Gordon, minister of labor, told the House of Commons.

As a result of Dominion aid Saskatchewan coal had practically displaced competitive foreign coal from the Manitoba market.

"But," said Mr. Gordon, "the paradox is that instead of any control being exercised over coal mines in Alberta about 50 new mines have been opened in the last few years. All mines in the province under the control and jurisdiction of the provincial government."

Zeppelin Company Formed

Dr. Hugo Eckener, President Of New German Line

Berlin.—Gen. Hermann Wilhelm Goering, air minister, announced the formation of "German-Zeppelin Lines, Ltd., Berlin," with a capital of \$5,820,000. The company has as its president of the board of directors, Dr. Hugo Eckener of Graf Zeppelin fame. The chief engineer of the Graf Zeppelin, Ernst Lehmann, was appointed as one of the managers of the company. The purpose of the company was described as for the "erection of new airlines and regular air traffic for passengers, mail and freight with dirigibles."

INTRODUCES BILL

Premier Angus L. Macdonald, of Nova Scotia, who is to introduce a bill in the Nova Scotia Legislature which will set up a permanent civil service for Nova Scotia in line with a recommendation of the Jones Commission of Economic Enquiry.

Fur Farms Prosperous

Alberta Now Has Industry Valued At Million Dollars

Edmonton.—With the number of fur farmers in Alberta more than doubled in the past two years, and with quality of pelts greatly improved from adherence to established scientific methods of raising fur-bearing animals, this type of farming in the province has been raised to the status of a \$1,000,000 industry, according to Stanley H. Clark, provincial game commissioner.

There are now 500 licensed fur farmers in the province. Others are engaged in the profitable activity of increasing numbers, either as a department of ordinary farm operations or as an exclusive enterprise. Mink,itch, beaver, marten, muskrat, racoon and badger are all bred in captivity for commercial purposes as well as the fox.

Gold Production Mounts

Canada's January Output Worth Over Eight Million Dollars

Ottawa.—An increase of more than 15,000 ounces was shown in production of gold in January when the output totalled 249,029 ounces compared with 231,288 ounces in January, 1924. The Dominion bureau of statistics reported.

Ontario led the provinces with an output of 179,084 ounces, and Quebec second with 22,102 ounces while British Columbia was third with 25,726 ounces. Manitoba and Saskatchewan produced 168 ounces, Nova Scotia 380 ounces, Alberta 10 ounces, and the Yukon had an output of 23 ounces of alluvial gold.

The above is the gold in Canadian funds in January was \$34.95 per ounce, valued at this price, the Canadian output was worth \$8,703,564.

Object To Jap Goods

Shanghai, China.—"The 'breathtaking' nation-lamenting group" is the newest thing in anti-Japanese societies to make its appearance in Shanghai. Members of the society congregated in front of Chinese shops to hold a protest against Japanese goods. They beat their breasts, sing a wailing chant, and then smash the windows of the shop, taking to their heels as soon as policemen appear.

RAREST STAMP FOR SALE

The rarest stamp in the world—it is insured for \$50,000—has just arrived in England from the United States for sale in London. It is the British Guiana one-cent stamp, the only one in the world, the property of Mr. Arthur Hind, who purchased it in Paris in 1922 for 200,000 francs (then worth about \$37,000). Here we see the stamp being examined by Mr. Gordon Harmer, famous British stamp expert.

Changes Announced By Finance Minister Rhodes In His Budget Speech

Ottawa.—Wide concessions to British Empire countries and to their mandated territories, drastic reductions in liquor duties that will be passed on to consumers and a strengthening of the British preferential rate on woolen yarns were outstanding features of the tariff changes announced to the House of Commons by Finance Minister Edgar N. Rhodes, in his budget speech.

Interpreted generally as a poor man's budget, it increased corporation and income taxes, abolished last year's gold tax but made it up by special levies against mining companies and their shareholders and for the first time in Canada, taxed money and property passed between members of a family with the design of lessening income and inheritance imposts.

At the same time several new elements in Canadian political history made their appearance.

In the first place, the budget resolutions set forth that the cut in liquor imposts would be passed on to the consumer. If provincial liquor control boards do not conform to this, the government takes the power to reimpose the tax on private duties.

In the second place, Canada may, by order-in-council, declare British Empire countries and mandated territories "most favored nations."

This sweeping policy would have the effect of completely eliminating the application of the general tariff to goods imported from Britain, and provided such imports were entered into Canada through Canadian ports.

Third, for the first time in tariff history by tax-back principle is applied under the British preference. Only one item is affected—No. 1035. This sets forth that cotton velvet and cotton-back silk-pile may enjoy a drawback of 99 per cent. of the duty when these articles are imported "under the British preferential tariff" for use by manufacturers in making certain types of boxes or cases.

A surtax ranging from two to 10 per cent, was announced on investment incomes in excess of \$5,000 and on all incomes in excess of \$14,000.

Downward revision on 48 items of customs tariff was announced, with four items revised upward.

Excise tax on spirits is reduced from \$7 to \$4 per gallon, with appropriate reduction in customs rates on imported spirits.

Gold premium tax is discontinued after May 31, 1925, and depletion on gold on mine income taxes will be reduced to offset revenue reduction.

Solve West's Problems

Will Repay All Debts With Return Of Normal Crops

Ottawa.—The belief that, with co-operation of governments, financial institutions of the east and the west, the problems of the west would be solved, was expressed here by Premier J. G. Gardiner, of Saskatchewan. He added that people of the west would repay a hundred fold every sacrifice which might be made by people of Canadian in assisting to maintain westerners on their land.

Premier Gardiner was addressing a meeting of the University Club of Ottawa. He said that the question today was whether or not the west could come back—if it could again produce the wealth it had in the past. If the west could get back to the crops and prices which prevailed before the depression he believed Saskatchewan could pay off its debt and have money left over for gasoline and other luxuries."

Arrests In Russia

Moscow.—Soviet authorities have announced the arrest of 1,074 members of the old aristocracy and old moneyed class. Some of them, it was said, will be tried for "activities against the state in behalf of foreign countries," while the rest will be exiled to the eastern reaches of the Soviet Union.

Will Go To England

Passadena, Calif.—Although still in poor health, Vincent Julian Beryl, who suffered a heart attack recently, has improved slowly and plans to leave for England about the first of next month. He came here for relief from bronchial trouble.

Results Of Hedging Operations In Wheat Are Not Disclosed

Ottawa.—The accepted-like wheat operations of John I. McFarland, head of the central selling agency for the Canadian wheat pools, which has been sought by the Canadian government to answer charges of defrauding the Dominion of \$71,000 in war reparations claims. Commissioner Blandford has previously recommended Hartfield's extradition.

Advocates Cost Quota

Edmonton.—Adoption of a compulsory cost quota system under which the eastern market would absorb part of the Alberta production was advocated in the legislature by A. Straton, Labor minister for Lethbridge.

The labor minister said lump sums will be paid again this year to provinces to finance direct relief with municipalities. The system was introduced in history, no districts or provinces were dissatisfied with the cash settlements, the minister believed it had worked well.

Italy Covets Ethiopia

Country Is Great Treasure House Of Natural Resources

One of the richest territorial goals in all Africa is the prize awaiting Italy if it succeeds in its apparent design to make the ancient black kingdom of Ethiopia a part of its colonial empire.

With inestimable amounts of unmined gold, silver and platinum; virgin forests of valuable timber; rich soil, and temperate climate in its highlands, it is one of the few undeveloped territorial treasures left in the world.

Hostility of its black warriors, known as the world's fiercest fighters, to foreign encroachment has kept it virtually untouched by the development of modern civilization.

Although the kingdom lies wholly in the tropics, its nearness to the equator is counterbalanced by its elevation. The climate is healthy and temperate, with bracing air. It is dry from October to mid-June and rainy from June to September.

Vegetation is dense in the valleys and luxuriant in the uplands. Torrential rivers, which feed the Nile, and scattered lakes make the soil exceedingly fertile. Most of the agricultural regions yield two and many crops a year while the land is admirably adapted for stock raising. Natives get their simple needs from the wilds with little difficulty.

The fall-fall is considered to hold great potentialities for the cultivation of grains and vegetables, while the low lands hold similar promises for rubber and cotton plantations. Coffee already is cultivated by the natives on a small scale.

Wild game and fruit trees of every description abound. In the highlands there are large forests of valuable virgin timber.

Traces of gold, iron, coal, potash and other valuable minerals have been found in promising quantities, but no thorough survey ever has been made of the extent to which they exist. In the southern Abyssinia has nearly everything Italy needs.

The kingdom's chief export, *ji-hut*, now under French control, is at the entrance of the Strait of Bab-el-Mandeb, one of the gateways on the shipping lanes from the Mediterranean to the east.

Review Of The Fleet

Will Be Brilliant Event At Portsmouth In July

Plans for a brilliant week of royal festivity in July, when the King will hold the Jubilee review of the fleet at Spithead, are already being made at Portsmouth and in London.

Vessels ranging from giant warships to small auxiliary craft to the number of 200 are expected to take part in the review, including the whole of the reserve fleet, a large section of the reserve fleet and the fleet arm. Many famous ships will be there—*Nelson*, *Rodney*, *Malaya*, *Valiant* and *Barham*—and possibly *Hood* and *Bismarck*, which were recently in collision.

There will be five different sets of reconnaissance and fighting aircraft attached to the aircraft-carriers *Furious* and *Courageous*. It is expected that the King will arrive on July 16 and join the royal yacht at Portsmouth. Subsequently, if weather permits, he will hold the fleet to exercises at sea.

The civic authorities are likely to entertain a section of their naval visitors, facilities will be provided ashore for many thousands of ratings and the whole town will be decorated. The hotels are actively making preparations for an invasion.

Ten Most Charming People

U.S. President And Prince Of Wales Are On List

Miss Margery Wilson, who lectures on the gracious arts, selected these 10 persons as the most charming in the world:

President and Mrs. Roosevelt, Amelia Earhart, Pope Pius XI, Emperor Hirohito of Japan, Princess Elizabeth of England, Bill Robinson, the negro tap-dancer, the Prince of Wales, Anne Lindbergh, and *Benja* (Benja, Norwegian film star).

All can possess charm, Miss Wilson said, who "will be themselves."

Thousand Dollars For Song

The thrill of getting off the relief rolls with a \$1,000 cheque for writing a popular song came to Mrs. Julia Louisa Cowell. She had been singing in an emergency relief administration chorus at San Francisco. In her spare time she wrote a song, called it "My Brown-Royal Sweetheart," and sent it to New York.

More than 100,000 dogs are killed on the roads of Britain every year.

Great Demand For Seals

To See Royal Barge Carry Royal Down The Thames

A pageant recalling the glories of days when the Thames was London's main highway, will form part of the celebrations of the King's Silver Jubilee.

The Royal State Barge, the oldest vessel afloat, first launched in 1687, will be used by Their Majesties in a procession in which will participate every type of craft, including, if possible, some of the old state barges belonging to the city companies and other bodies.

Friday, May 10, has been provisionally fixed as the date. The present suggestion is that the boats, some days prior to the pageant, shall take up their position along both banks of the river, from Greenwich to Chelsea; that they shall be hung with flags by day and illuminated by night.

At the appointed day, the main procession, led by the Royal State Barge, will start at Greenwich, the anchored craft taking up their proper positions as it moves towards Chelsea.

As the event will take place in the evening, along a floodlit river, thousands of citizens and visitors will be able to view it from the embankments and from the bridges, as in bygone days they watched from the river banks kings and queens dining in their gilded river craft, or stately galleys by boat to Parliament.

Meanwhile, seats and boxes of seats on the route of the Royal procession from Buckingham Palace to St. Paul's, for the transiting service, are selling at prices ranging from £3 to £15 a seat.

A block of 200 seats round St. Clement Domes Church in the Strand is nearly sold out already at £10 apiece. Hundreds of applications have been received for seats at £10 in St. Paul's churchyard.

The Canadian Pacific is said to be counting on the transportation of not less than 20,000 Canadians.

Dinosaur Will Be Mounted

Gigantic Fossil To Be Placed In Alberta University Museum

The gigantic fossilized skull of a dinosaur whose remains were found in the Red river valley, near the mouth of Berry Creek, is being prepared for mounting at Edmonton by George F. Sternberg of Fort Hays College museum, Kansas.

The distinguished geologist and paleontologist is actively engaged removing the matrix from the fossil, which is 24 inches in length. The body measures approximately 27 feet. When assembled it will be placed on exhibition at the University of Alberta museum.

The bones of this carnosaurus animal, to which is known as *Tyrannosaurus rex*, were found in Cretaceous strata. To the scientist, this means the mammoth roamed the prairies in the early part of the ice age—100,000,000 years ago.

Fossils of imperial elephants and other gargantuan of the animal kingdom have been found in Saskatchewan and Manitoba. They were driven southward by a moving ice pack and disappeared during that early age.

Demand For Horses

Reports Of Serious Horse And Mule Shortage In U.S.

Reports of a 10,000,000 horse and mule shortage in the United States were viewed with interest by the ranchers and dealers of southern Alberta.

Few sales have been made to the United States this year, but the eastern Canadian demand promises well, and good paying shipments have been made to Nova Scotia and New Brunswick.

The eastern market has opened two or three weeks earlier than usual, with prices well above 1924. Demand is for horses weighing around 1,500 pounds, young, and bred to harness. Prices range from \$125 to \$150 a year.

Exports of Canadian dressed poultry to the British market have been larger than ever since the recent amendments to the Dressed Poultry Regulations pertaining to the individual bird marking and compulsory inspection of poultry became law on November 10, 1924.

Practically every part of the cow, including the blood, is used in making salamis.

London recently had 22 false fire alarms in 48 hours.

Our eyes are only one star in 5,000,000.

DOMINIONS' SECRETARY TO CELEBRATE JUBILEE

The Of The House Of Commons

The human body is often referred to as a furnace, the food as the fuel, and the three elements in that fuel, namely, protein, fat, and carbohydrate, the last named is referred to as the energy giver. Potatoes supply energy. As regards their general composition, they are slightly acid and contain a quantity of starch, a trace of sugar, a small amount of protein, and a large amount of water. The percentage of these component parts is: Carbohydrate, 18 per cent; minerals, 8 per cent; protein, 2.1 per cent; fat, 1 per cent; water, 79.9 per cent.

The following are recipes for the everyday use of potatoes:

Baked Potatoes—Select smooth, uniform sized potatoes. Wash, scrub, and place in a dripping pan. Bake in a hot oven 40 minutes or until soft; remove from the oven and serve at once. If potatoes are to be used for soup, they should be allowed to stand, until the skin is ruptured for escape of steam, they become soggy. Properly baked potatoes are not easily digested than potatoes cooked in any other way, as some of the starch is changed to dextrin by the release heat.

French Fried Potatoes—Wash and pare small potatoes; cut in eighth lengthwise, and soak one hour in cold water to cover. Drain and pat in boiling salted water to cover, two minutes; again drain; plunge in cold water, dry between towels, fry in deep fat until delicately browned, a few at a time and drain on brown paper and sprinkle with salt.

Had No Training

Winnipeg Man Expert At One Of Most Difficult Arts

Walter Phillips, R.C.A., of Winnipeg, is known in the art world as an outstanding chronographist. In plain English, that means that he produces colored prints from woodcuts—one of the most difficult of all artistic labors. He first sketches a design on Japanese mulberry paper, pastes this on a cherryboard board, and after cutting through paper and board for some 50 hours, his "key block" is made. This block is then coated with color and pressed like a rubber stamp against a sheet of paper. For each color in the complete print a separate block is required, and great care is necessary in turning out a finished print. Walter Phillips has had no training other than a bookish knack of handling a penknife.

The quantity of branded beef sold in Canada during January, 1935, totalled 4,238,284 pounds, an increase of 1,621,480 pounds compared with January 1934. The amount sold in January 1931 was 586,166 pounds; 1,448,859 pounds in January 1932; 1,941,476 pounds in January 1933, and 2,669,341 pounds in January 1934. Two weeks ago sales of branded beef in Vancouver broke all previous records.

Limestone consists of carbonate of lime and some impurity which gives the stone its color.

Lectichthys was a sacrificial ceremony among the ancient Indians.

More than 15,000,000 pounds of rice were produced in Italy last year.

Ship Eggs By Air Route

Hatching Eggs Are Shipped 12,500 Miles From Britain To Australia

An experiment never attempted before of sending a hatching of 12,500 miles by air, has just been carried out in connection with the recent departure of the first mail service from Australia to Australia, according to a dispatch received by Cunard White Star Limited, agents for Imperial Airways.

The eggs were consigned by Captain the Hon. C. C. Greenway (now Lord Greenway) from his poultry farm at Stanbridge, Epsom, Surrey, to Mr. F. P. Finney, of the Rhode Island Egg Club, Sydney, New South Wales.

On their first stage the eggs were flown from London to Paris. Then came a train link to Bristol, and after this an air voyage across the Mediterranean in one of the big Imperial Airways flying-boats. From Cairo the lead went on above the Persian Gulf to Karachi.

Across India the stages were flown in one of the monoplane air-liners operated by Indian Transport Corporation, an associated company of Imperial Airways.

From Calcutta the flight continued to Rangoon and Singapore, then on to Port Darwin and Brisbane—these new sections from Malaya to Australia being operated by Qantas Empire Airways, another associated company of Imperial Airways.

The consignment of eggs reached Brisbane on the day after the flight, London, as compared with a journey of 45 days had they gone by land and sea transport, representing a saving of 35 days.

From Brisbane they continued to Sydney by rail, being delivered to Mr. Finney a few days later. The immediate result of the experiment was found, and it to be in perfect condition, not a single egg having been damaged in transit.

This first consignment of hatching eggs by air from England created immense interest in Australia. Photographs of the eggs, and of the box which they travelled, appeared in the press, with full accounts of the experiment.

Meanwhile, the recipient of the eggs, has since communicated with Qantas Empire Airways, and also with Lord Greenway. In one letter, after thanking the latter for the consignment, he expressed his belief that the results actually obtained in the hatching of the eggs, he says: "This experiment has created a 'stir' everywhere throughout Australia, and I feel personally that it will open up and develop the importing and exporting of hatching eggs to many parts of the world."

Care Of House Plants

Lakewood Water Should Be Used For Best Results

Watering plants correctly is half the battle in their winter care. Sometimes, if the pots are too full, the water runs out without reaching the roots at all. There should be a space of about half an inch at the top of the pot.

Where it is impossible to remove enough of the top earth, watering should be done by setting the pot in a flat pan of water, so the moisture can rise through the drainage hole in the bottom. Some ferns should always be watered by setting the pot in a tub so that the water comes within an inch of the top of the pot. This ensures thorough soaking without injury.

Cold tap water is usually hard on house plants. Hot water should never be used, excepting in the treatment for worms which requires that the pot be filled with water. For ordinary purposes, soft water heated to lukewarm stage is best. It causes no shock to the plants and hastens growth a little.

Most well-learned house plants require sponging to keep the pores of the leaves open. The sponges, then, but mild soap followed by clear lukewarm water will help prevent the harboring of pests.

Watering of house plants are of benefit to all house plants, with the exception of a few like the gladiolus, the leaves of which are covered with a waxy skin. These fern types resist the presence of water drops and should be left to themselves. The majority, however, relish the moist atmosphere surrounding them after the spraying is over.

Canada was easily first among the exporters of cats to the British Isles in 1934, with 1,041,270 cats. This was considerably more than half the amount imported into Britain from all sources.

FANCFUL FABLES

TO BE SURE YOU GET Fast Relief

Get rid of 12 tablets or essential bottle of four (4) Aspirin tablets.

Does not harm the heart.

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" ... cases even a bad headache, neuralgia or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not burn the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

THE TENDERFOOT

BY GEORGE R. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The three partners are pretty well acquainted with the law, but not so much with the facts of the case."

Dad Keene, desert rat and luckless prospector till now, tells the story of his life. He tells of his first love, Dustin and Spike Goddard, who had grabbed him, of his discovery of a rich gold mine, and shows samples of the ore.

He tells of his unexpected coming along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions the dispute could be settled by marrying him. He insults Stone, who, prompted by throws him into a pool of water. Dustin learns that Gerald Keene has been sent for, and that Dustin Stone has seen the Broken Spur men running their cattle on the range.

He sets out with Dad Keene to learn the location of his gold discovery. Dad Keene shows Dustin the mine. Dustin goes back to camp, and Dustin shows Dustin the mine. Dustin goes back to camp, and Dustin shows Dustin the mine.

He goes back to camp, and Dustin shows Dustin the mine. Dustin goes back to camp, and Dustin shows Dustin the mine.

The court-house door. Dustin's finger crooked in the shadows and another figure joined him; the loose, shambling figure of Peyotl Gregg.

"See that man, Peyotl?" Dustin pointed to Stone. "That man has come in to meet the man to Gerald Keene, who comes on the night train. The man will call himself Kane. You see, the old man found a gold mine and it was on the Hour-glass land. This nephew wants to find him. If he finds him ... you'll hang. Don't forget that. I'll be at the hotel when you're ready to go back to the Broken Spur."

Peyotl gave him one frenzied glance and his right hand sought his coat pocket. Dustin gave a little gasp. The man was half-armed with fright and murderous intent. Dustin grabbed him by the arm. A little white foam lay in the corners of Peyotl's mouth and his eyes glared with a light there was no mistaking.

After a dozen of those infernal cigarettes Peyotl was ready to kill and Dustin knew it.

"Don't you take a chance," he muttered. "Don't put anything at the station or in public where people can see you. Wait, you've got to get a chance in the dark if you wait. I'd tell 'em if I were you and choose some dark place. Of course, I don't know what you're planning. ... You're a damned fool, Peyotl. ..."

He sauntered off in the dusk and Peyotl, half walking, half reeling, headed for the little station.

Stone had already picked up Carr and was waiting at the station. Carr when the train came in with a sheet of flying papers from the hard-set braces. Stone himself was not much of a stunner. He was a little man and was almost knocked off his feet by the rush of a man who did not wait for the train to stop.

"Dare Stone, by all the gods! ... A great hand smote Stone on the shoulder, almost knocking him over. "Who's with you? We must get going. ..."

"Wait a bit. ... Stone muttered between his teeth. "Here's your chance. I'll wait for you. I've got to tell you. We need two heads here. ..."

The crowd presented any exchange of confidences and then Carr came up with old Joe Carr.

"Dare Stone, by all the gods! ... A great hand smote Stone on the shoulder, almost knocking him over. "Who's with you? We must get going. ..."

CHILDREN'S COLDS

ENDED SOONER without doing

PROVED BY 2 GENERATIONS

IN MENDEZ'S JACAL, PEYOTL took a count of stock. Mendez was absent but Peyotl knew where to find what he wanted. From a hole in the trodden clay-floor he extracted an iron box from which he took a red-and-green package of those ill-favored cigarettes, lit one and sat down to think. The very first puff stimulated him; the next gave exhilaration. Dustin was a good friend who had given him excellent advice and the future seemed rosy and happy. He passed rapidly from the first stage of half-listed despair to the second, in which he saw complete fulfillment of his own desires. When he had smoked three cigarettes on an empty stomach he knew suddenly that he faced a golden future. If only this man Gerald Kane ... or Keene ... could be removed.

Who was this stranger that he would should a man to the gallows? "By God, Kane!" The home-made cigarette he lit. He flung the cigarette to the floor, stamped on the spark, felt in his pockets and laid their contents before him. ...

Three Steno, by all the gods! ... A great hand smote Stone on the shoulder, almost knocking him over. "Who's with you? We must get going. ..."

"Wait a bit. ... Stone muttered between his teeth. "Here's your chance. I'll wait for you. I've got to tell you. We need two heads here. ..."

The crowd presented any exchange of confidences and then Carr came up with old Joe Carr.

Another Tradition Upset

Earth Ebbs And Flows Like Tides Of The Sea

A favorite occupation of physical scientists is the careful upsetting of history, fables, or common belief by the insertion of facts which prove or explain how things really happened.

From time immemorial the good dirt regions of earth have been considered stable. Even the Romans famed investigators of tall stories, never thought of calling the ground anything but terra firma. Now Dr. Harlan Stetson, Harvard astronomer, tells us that not only are we walking on a thin upper "crust" of a wrinkled old apple called Earth, but even this crust heaves and fro like the tides of the sea.

Everyone knows the sea has its ebbs and flows, but no one guessed that land areas could be affected likewise until Dr. Stetson said so. With superlative clocks or chronometers, and more careful squinting at the stars, he corrected those "clocks" to the spot second and found that Europe and America drift apart as much as sixty-three feet twice daily and come together again with the same amount. All which means another time worn tradition is ready for the discard.

But for all the recalcitrance, when Peotl and Harlan Bill ashore with their curious "aceles" they can't get away with any tales about how difficult it is to get used to the billowing waves of land tides after a peaceful jaunt at sea. Nor is sixty-three feet enough of a variation to excite European or American fluctuations of policy when attempts are made to agree on matters of trade, finance and world peace.—Christian Science Monitor.

THE RHYMING OPTIMIST

By Allyn Michaels

THE SPIDER'S WEB

The tinted symmetry of a shell, The clear design on a turtle's back, These strangely prove to me all of that.

That there is no shadow of foul or fair, The patterned sheen of a peacock's tail, The splendid hues of the pied macaw, These show a power which does not fail.

In its changeful purpose, its perfect law, The spider's web and the stars that wheel, The turning sides and the world's wide whirl, Whirling on and on until thought must reel.

These are the work of an Infinite One, The purity lies in an iris bloom, The stripes of bronze on a kitten's foot, Strangely free me from fear of doom, And strangely cheer me with hopes of grace.

A Real Weather Prophet

Story About Bettie In Alberta is No Myth

Not all stories about insects as weather forecasters can be dismissed as myths. Alberta has an insect that is a real weather prophet. It is the manure beetle, of the genus Aphodius, which emerges suddenly in the spring and autumn in countless thousands. A thorough study of the weather records fails to give any reason why the beetles should fly when they do, says H. L. Seaman of the Dominion Entomological Laboratory at Lethbridge, but there is a distinct and valuable connection between the beetle flights and the weather that follows. The first flight in the spring is usually the fore-runner of a cold spell with snow, but this cold period is the last before spring growth conditions arrive.

The Pony Express

Was Started In United States 75 Years Ago

Just seventy-five years ago the Pony Express, which used to carry mail in the United States, was started. The most famous of these services operated between San Francisco and New York. There were 80 of the finest horses and 400 hardy men in the service. They worked in relays of 80 to 90 miles each, and covered the transcontinental journey in nine days.

Evidently He Knew

The teacher asked whether any one could give her a good definition of toast. Only one hand went up.

"All right, John, you tell us about toast," said John confidently, "a burnt bread scraped."

Strange Facts About Clothes

Origin of Many Fashions We Take For Granted

Why does a tailor place a man's coat buttons on the right side? Because this fashion enabled him more readily to get at his dagger. Why are stockings adorned with "clocks"? Because they were originally put on to hide the garter seams, when only cloth stockings were worn, and were later retained because they were considered ornamental. Why are men's hats surrounded by a useless ribbon? Because 4,000 years ago women bound a loose fabric about their heads by means of a strip. Why do husbands and grandsons wear bow ties? Because they borrowed the original head-dress of Hungarian mercenaries in the British Army. This was a cloth cap edged with fur. Regimental jealousy kept adding inches to this narrow adornment until the cap became all fur except its crown! Why does a man's morning coat bear two useless buttons above the tails? Because coats used to be almost like skirts, which needed buttoning to gn and ah and ed buttoning up to keep them out of the way. Why does a barometer wear a black gown? Because, when Queen Anne died all the barometers went into mourning—and Queen Anne is still dead!

Feet Of Writing Experts

State Witnesses In Hauptmann Trial Ask Big Pay

U.S. Attorney-General David T. Welles said the fees of some of the handwriting experts and others who testified for the state at Bruno Richard Hauptmann's trial were so high they would not be paid until they are paid.

Seven of the eight handwriting experts, who swore that Hauptmann wrote the Lindbergh notes, submitted bills totalling \$45,000. The eighth, Dr. Wilmer Souder, United States government expert, of Washington, put in only a bill of \$69.15 to cover his expenses.

Highest of all was Albert S. Osborn, dean of the experts, who billed the state for \$12,000 for his services. His son, Albert D. Osborn, asked, \$6,555.

Watch Is Recovered

Lost in a Bag of Relief Foodstuffs, Watch Will Go Back To Ontario

Lost in a bag of relief foodstuffs forwarded in a carload to Saskatchewan last fall, a wrist watch belonging to Mrs. Oscar Coleman, Delta, was returned here.

The watch was found by a relief recipient at Lussland, Sask. Mrs. Coleman missed the watch after the bag was forwarded and word was sent to Saskatchewan where a newspaper advertisement led to recovery of the timepiece.

The remarkable thing about family pride is that people can be proud of so little.

Bunches of small carrots were used as corsages by the ladies of the court of Queen Elizabeth.

Little Helps For This Week

"He that is slow to anger is better than the mighty, and he that rules his spirit than he that taketh a city."

Purge from our hearts and strains so deep and foul, Of wrath, and pride, and care; Send Thine own holy calm upon the soul, And bid it settle there.

Let this truth be present to thee in the excitement of anger—that to be moved by passion is not manly; but that mildness and gentleness, as they are more agreeable to human nature, so also they are more manly. For in the same degree in which a man's mind is nearer to freedom from all passion, in the same degree it is nearer to strength.

It is no great matter to associate with the good and gentle, for this is naturally pleasing to all, and everyone enjoys peace and loveth those best who agree with him. But to be able to live peacefully with hard and perverse persons, or with the disordered, or with such as go contrary to us, is a great grace, and a most commendable manly thing.

PILE TORTURE NOW UNNECESSARY

Writer Offers To Prove Swift Value Of Hemo's

The letter and author of Hemo's is well known to the public. The value of the delivery of the subject, may hesitate to see.

Why continue the miserable torture of piles, which you can cure with Hemo's, a simple and safe, pleasant home treatment may cure you of piles, hemorrhoids, and other ailments.

A Law Every Mother Should Know and Observe

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years doctors have called "PHILLIPS' Milk of Magnesia for your child."

So—always say "Phillips" when you buy. And, for your own peace of mind, that your child gets this; the finest milk made in Canada.

Thursday, April 18th, 1935

To-morrow, April 19, is Good Friday, and is a public holiday.
Easter Monday, April 22, is a bank holiday.

Dun & Bradstreet now forecast the sharpest rise in American business in twenty-five years.

R. Arthur, of Estuary, was a visitor to town on Wednesday night's train.

Pre-emption and late weather conditions have increased the farmer's optimism for the coming season, it is not expected that there will be much work on the land until the 1st of May.

J. Anderson made a trip to Laporte, Sask., the first of the week and found the roads in very poor condition.

Don't forget St. Mary's East of Sale and Tea, April 20th. In the old beer parlour, Empress Hotel, commencing at 3 p.m.

On Good Friday in the United Church at 2:30 p.m. An appropriate service of song and readings will be given by the W.M.S. Everybody welcome.

It is said that June 20 is a probable date on which the provincial elections will be held.

D. Lush is away on a trip to Hilda today.

Father Sullivan, was indisposed this week with throat trouble.

Next Sunday, being Easter, a special Easter Service will be held in the United Church. Everyone invited to this service.

Rev. J. S. Parke, who went to Alaska last week, intending to drive to Regina with Rev. O. M. K. Parsons and Canon Hassell, did not do so on account of the indisposition of the latter. Canon Hassell was to have been presented with a medal by the Earl of Bessborough on Saturday morning at Regina, in connection with Boy Scout activities. Chief Scout Lord Baden Powell, being present. Mr. Parke had considerable trouble in making the return trip from Alaska.

Whooping Cough

Highly contagious at all times, highly dangerous for the child under three years of age, and particularly so for the baby, is a fair description of whooping cough.

Like several other complaints, whooping cough starts as an ordinary cold, with a running of the nose, a dry cough and a little fever. Instead of clearing up like a cold, however, the cough persists until it becomes a series of explosive coughs ending up with a crowing sound, or whoop, as the child is at last able to draw in his breath.

The child is frightened by this experience. Vomiting frequently occurs, and between loss of food and loss of sleep, the little patient's weight and strength is apt to diminish. The younger the child is, the more serious is the condition. In Canada, last year, there were 352 deaths from whooping cough, and no less than 268 of these were children under one year of age. In the case of older children, whooping cough is uncomfortable and distressing, but it is seldom dangerous.

The responsible germ comes from the throat and bronchi of the one who has the disease. The germ is thrown out in the mouth spray which accompanies coughs and sneezes, and so he sprays his germs into the faces of those who are nearby.

A really practical difficulty in the control of whooping cough arises out of the fact that, during the week or two when the child who is developing the disease, but who apparently has nothing more than a common cold, the infection is being spread to those with whom he comes into contact.

It is obvious that it is the young child, and above all

others, the baby, who must be protected. This means that no one who has a cough or cold should come near the child, and that no coughing youngster or sneezing relative should be allowed to hang over baby's crib or cradle.

The child with whooping cough requires a lot of fresh air and sunshine. Most deaths occur because a pneumonia develops; the whooping cough seems to make the lungs ready victims for further disease, such as pneumonia. For some unknown reason, females suffer more frequently than males. One attack usually confers immunity for life.

There is a lack of unanimity concerning the value of whooping cough vaccine as a preventive measure. Some authorities have had good results; others have not. This is something to talk over with your family doctor, but, in the meantime, keep your young child away from those who have colds, remembering that what appears to be a cold may be the onset of whooping cough or measles.

HIDE AND HIKE
in ROCKIES

New territory in the Canadian Rockies will be opened this year by the Skyline Trail Hike and Trail Riders of the Canadian Rockies, two societies whose members come from all over the world to enjoy those splendid recreations. On foot and on horseback, they set out from the Canadian Pacific Hotel Springside to conquer the mountains—not just to climb them, but to capture their beauty with cameras, to erect friendly, cheerful camps on their heights, and to carry away from their wooded slopes health and pleasant recollections. The official flag-line Trail Hike, from the second of August to the first of September, is the first of the series. The trail will follow part of the trail taken through the Rockies in 1911 by Sir George Simpson, governor of the Hudson's Bay Company.

It is planned to motor from Banff Springs Hotel to the game warden's cabin on Italy Creek on August 2, hiking to the Canadian Pacific Hotel, the Sunshine Camp, the first day. In the second and third days Simpson Pass will be crossed and the second camp made at one of the Trout Lake, near Mummy and Search Lake. The third night will be spent at Shadow Lake and the final Pow-Wow will be at Castle Mountain Camp on the Bow-Whispering Trail, after which buses will be available for those who wish to go to Banff. The whole distance will be about 53 miles. The official five-day hike of the Trail Riders is from July 30 to 20 and this year takes in the Red Deer River, former famous hunting ground but now included in

the Banff National Park, which limits all hunting to gamekeepers. The trout fishing is excellent and camp time will be not aside for fishermen, while the others in the party will take pleasant side trips. The party will motor about 11 miles from Banff to the crossing of the Cascade where horses will be waiting. The first camp, used for two nights, will be somewhere near Windy Camp. They then ride over Snow Creek Pass to Scotch Crib on the Red Deer and turn west to the second camp. The trail will follow the Red Deer to its source, and turn south to Baker Lake and Parnassia Lake to a camp in the Parnassia Valley. The fifth day's ride is to the Sun Throne and back to Banff. The trail is a

poor to be the outgrowth, it is doubtful whether such a meeting will meet with the approval of citizens of the province in general.

R. M. of Mantario-cont.

their dependents in an adjoining municipality, unless or until, in which no provision is made for hospitalization of ratepayers, who personally operate and supervise the work on farms of a quarter section or more, for which they are assessed, owning and using their own equipment and in regard to which the bene-

fits of the hospital have not been passed on by the said owner, or to his help either as tenant or occupant, in proportion to the assessed value of the property owned in this adjoining municipality.

(b) Residents and their dependents in an adjoining municipality, but within the outer boundaries of the Rural Municipality of Mantario No. 202, who are assessed for farm lands as above, in regard to which the hospital benefits have not been passed on to the tenant or occupant.
